

High Voltage LED Strip Light

Features:

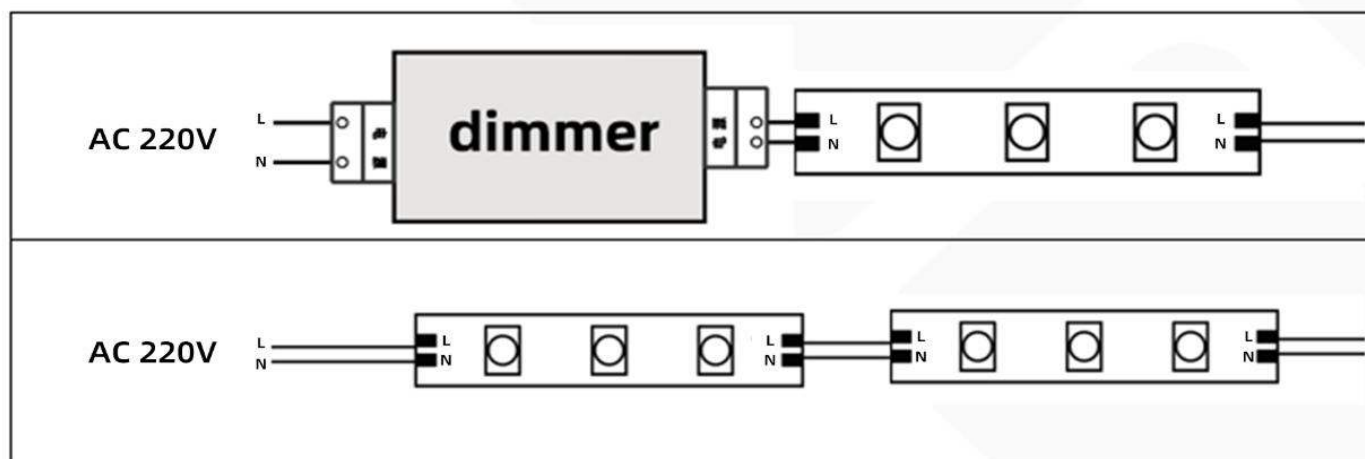

- Constant current driving design
- Direct to 120V/220V without any AC/DC transformer
- 2 oz double sided flexible PCB
- 50 meters running with less voltage drop
- More than 30,000 hours working life

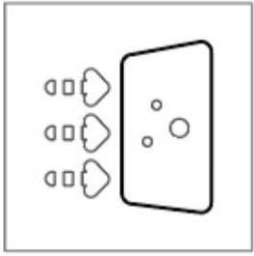

Parameter:

Type : 2835 LED Strip	LED QTY per Meter: 60/80/120
Colors: 2500K-6500K	CRI(Ra): >80
Voltage: 120V/220VAC	Watt: 7-10w/m
FPC Width: 10mm/12mm	Strip Width: 12mm/14mm
Cutting Unit: 25cm	Efficiency: 100~110lm/W
FPC Thickness: 2 ounces	IP Grade: IP65/IP67/IP68
Working Temperature: -40°C~70°C	Packing: 10m/20m/30m/50m

Installation:

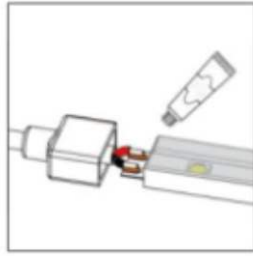

LED Strip Installation Steps:

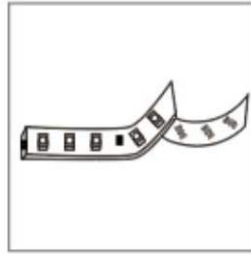

Clean the surface of object

Cutting

Seal the strip

Stick the strip

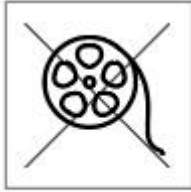

Power the strip

Pay Attention:

high temperature surrounding

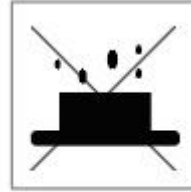

power led strip with reel

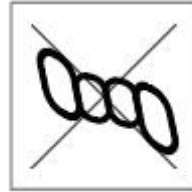

object surface with oil, dust and silicone

strip fold

dirty on the surface of LED

twist the strip
